

I've been an XM Radio user since August 2002. I do about 20-30,000 miles a year traveling around the Baltimore, MD area on business. The new traffic and weather report is a boon to me for the constant updating of information relating to traffic jams; pending bad weather, etc. I certainly want the FCC to reject NAB's petition 04-160. Let NAB become innovative and challenge XM Radio through competition, not through blatant censorship.
